Technical Skills

Languages: Java, SQL, Ruby

Backend: Spring Boot, REST APIs, API Design, Background Jobs, Async Processing, Feign, SSE, Ruby on Rails

Databases: Oracle, PostgreSQL, Redis, Database Design

Security: OAuth 2.0, MFA, PingOne, Rate Limiting, Secrets Management, API Encryption

Integrations & Tools: Razorpay, Leegality, Aadhaar, Udyam, GSTIN, PAN-to-CIN, TIN, Git, GitLab, Docker, AppSignal, Swagger, Bruno, Claude Code

Experience

RootQuotient Technologies

Chennai

Projects: Employee Retirement Management | Digital Loan Origination | Aviation Carbon Management

Software Development Engineer-II

Aug 2026 - Present

- Lead a **5-member backend team**, driving architecture and technical decisions, client-facing discussions and engineering standards across key production workflows.
- Lead backend engineering for **Employee Retirement Management** and **Digital Loan Origination**; mentor **2 junior engineers** on Ruby on Rails, backend design, code quality and business/domain standards.

Software Development Engineer-I

Jul 2024 - Jul 2026

- Owned backend delivery for **Employee Retirement Management** and **Digital Loan Origination**; resolved P0/P1 issues with same-day workarounds and typical permanent fixes within **2-3 days**.
- Diagnosed **PingOne/OLS authentication inconsistencies** across **25K+ users**; built Rake diagnostics identifying **~1K** impacted accounts and traced password-reset and expiry state divergence.
- Optimized retirement-listing queries serving **1K+ records** using EXPLAIN, benchmarking, indexing and targeted column selection, reducing response time by **~60%**; resolved N+1 queries and added AppSignal health monitoring.
- Implemented layered authentication across **3 public flows**, enforcing permanent user logout after **4 invalid attempts** and IP throttling after **9 attempts** with a **30-minute cooldown**; added configurable idle and absolute session timeouts across **5 user types**.
- Automated credential rotation across **3 repositories and 5 environments (15 credential files)** using Rake tasks, reducing manual effort by **~60-70%**; moved credentials to restricted runtime storage.
- Architected the Oracle data model for a configurable **13-step** digital loan journey with **~30 core tables**; delivered **20+ APIs** and verification handling for **12 types**, implementing **8**.
- Implemented configurable verification controls with per-verification attempt limits, blocking and audit tracking; kept the normalized core schema **~90% stable** as dependencies evolved.
- Developed a configurable step workflow using a step master and user mapping, allowing step order/status changes without modifying existing mappings and enabling users to resume journeys from persisted state.
- Reduced applicant manual data entry by **~40%** through API-driven prefill; orchestrated async processing for **5 third-party integrations** using requestUUID, Redis and frontend polling with Feign timeouts.
- Delivered Razorpay payment workflows with idempotent webhooks and SSE status updates; integrated Leegality e-sign, Redis-backed **10-minute OTP** handling and **Claude-assisted** encryption wrappers for FE-to-backend PII requests/responses.
- Achieved **98% backend test coverage**; introduced Dockerized Oracle development for Mac, documented setup, and used Swagger/Bruno for API and third-party integration testing.

Software Development Engineer - Intern

Jul 2022 - Dec 2022; Jan 2024 - Jun 2024

- Developed backend features and production fixes in Ruby on Rails and Spring Boot; contributed to code reviews and business discussions.

Personal Project

Department Meeting Scheduler

GitHub ↗

- Built a faculty meeting scheduling system using **Java, Spring Boot and PostgreSQL**, implementing conflict prevention, notifications and calendar management.

Awards, Certifications & Recognition

Above and Beyond - RootQuotient Technologies | **In Honor of Making Impact** - RootQuotient Technologies

AWS Certified Cloud Practitioner ↗ | **Building with the Claude API** ↗ | **Claude Code in Action** ↗

Education

M.Sc. Computer Science, College of Engineering Guindy, Anna University

2019 - 2024

Gold Medal for Proficiency
